

Peabody Signs Multi-Year Contract to Provide Coal to Midwestern Generating Stations

ST. LOUIS, April 15, 2025 /PRNewswire/ -- Peabody (NYSE: BTU) today announced it has signed a contract to provide seven to eight million tons of coal per year to Associated Electric Cooperative Inc. (Associated) for at least the next seven years.

"This substantial agreement demonstrates the ongoing importance of Peabody's coal in providing reliable, affordable baseload electricity for years to come," said Peabody President and Chief Executive Officer Jim Grech. "American demand for electricity is growing for the first time in many years given increased power needs from data centers and artificial intelligence. We are pleased to extend our long-term relationship with Associated and look forward to supplying their fuel needs well into the future."

Under this new contract, Peabody will supply Associated's coal requirements for the New Madrid Power Plant and Thomas Hill Energy Center in Missouri from the North Antelope Rochelle Mine (NARM), located in Wyoming's Powder River Basin.

Peabody's NARM Mine has delivered coal to Associated generating stations for over 30 years. NARM is the largest coal mine in North America and one of the largest in the world, selling 60 million tons of coal in 2024.

Peabody is a leading coal producer, providing essential products for the production of affordable, reliable energy and steel. Our commitment to sustainability underpins everything we do and shapes our strategy for the future. For further information, visit [PeabodyEnergy.com](https://www.peabodyenergy.com).
